DETAILED ACTION

1. This Office Action is responsive to amendment filed 11/6/06. Claims 1-9, 11-30, 32-36, 44-46 are pending in the application.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-9, 11-30, 32-36, 44-46 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,798,148.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious over each other.

The following side-by-side table is an example for comparing claim 12 of this application and claim 1 of US 6,798,148.

Claim 12 of this application	Claim 1 of US 6,798,148
A personal computer comprising: a body, a housing, an external connecting port, and an electronic circuit having a driving element,	A display device comprising a pixel, the pixel comprising:
wherein the driving element comprises a plurality of transistors, and	plurality of transistor, and
wherein the electronic circuit has means to switch between a series connection state and a parallel connections of the plurality of transistors.	means for switching a connection state between the plurality of transistors to one of a series connection state and a parallel connection state.

It can be seen above, claim 12 of this application is similar to claim 1 of US 6,798,148. Claim 1 differs from claim 12 in not explicitly recite an electronic circuit and a personal computer, however, it would have been obvious to realize that display device of claim 1 is an electronic circuit and is used with a personal computer.

Response to Arguments

4. Applicant's arguments with respect to claims 1-9, 11-30, 32-36, 44-46 have been considered but are moot in view of the new ground(s) of rejection.
